

WHITE PAPER

INTRODUCTION

A UNIQUE PROFIT GENERATING TOKEN WITH LOW MAX SUPPLY. The ARBITRAGING team are arbitrage masters that firmly believe that generating too many tokens is not the right method to produce long term growth in its value. A big problem in the current crypto market is people are investing in coins/tokens that have a large total supply - this means the coin/token value will appreciate very slowly. We are aiming to eliminate growth problems by only releasing a total amount of 10 million ARB tokens.

ARBITRAGING: The Revolutionary Arbitrage Trading Platform

WHAT IS ARBITRAGE TRADING? Buying a coin/token in one exchange at a low price and instantly selling it in another exchange for a higher price to immediately lock in a profit! The ARBITRAGING software will only buy a coin/token if it can sell it instantly for a profit - this means Your Trade Never Makes A Loss.

ARBITRAGE TRADING. You can invest your ARB token into the decentralised ecosystem exclusively from the ARB dashboard. You can then use our proprietary arbitrage software to start generating profits. Your daily profits will be delivered to you in ARB directly to your external wallet.

There is No Investment Lock In Period So You Can Withdraw Your Funds Whenever You Decide - ARB Gives You Complete Control. You can then keep your funds or optionally reinvest back into the Arbitrage trading BOT and continue receiving daily profits.

100% Of The Profits You Are Paid Are Produced By The BOT Software - We do NOT have a Multi Level Marketing or Ponzi structure - This ensures ARB will be a long term sustainable Arbitrage trading platform.

INNOVATIVE DECENTRALISED PLATFORM. We created the ARB platform so you can make transactions directly without any central organisation influence. ARBITRAGING will be the first Arbitrage trading platform that is 100% decentralised providing you with ultimate transparency.

Your external ARB, MyEtherWallet or MetaMask wallet will simply be scanned and read by our platform, so you will never have to hold your funds on our platform. You will never have to deposit on the ARB platform, so you have complete freedom to withdraw when you decide. Our exchange will also allow members to buy and sell ARB tokens directly to and from each other. When you use our Arbitrage trading BOT you will simply send your ARB to an external cold storage wallet and your daily profits will be sent back to your MyEtherWallet or MetaMask. This will be a game changer in the investment platform community and we will start a revolution in the market giving investors 100% control over their investment.

DEDICATED WALLET. As an ERC20 token you can hold ARB in a simple Ethereum wallet, but we are currently developing a wallet dedicated to ARB. Our wallet will be able to exchange directly with the ARBITRAGING platform for faster and instantaneous exchanges. The wallet will also allow you to make savings deposits safely. We also plan to make the ARB-dedicated wallet compatible with Trezor, Nano Ledger and more.

PROBLEMS WITH A HIGH TOTAL SUPPLY OF TOKENS

THE PROBLEM

- Some tokens have 100,000,000+ total supply, why would you need to have a such ridiculous amount of coins? High volume tokens will not increase in value.
- In the best case scenario, one of these diluted tokens can reach the value of \$5 per token by 2020.
- High volume tokens are not designed for a growth in value, many investors want a high ROI crypto-currency, not a slow moving crypto stuck in limbo.

OUR SOLUTION

- We will only generate 10 million ARB in total, this will ensure the value of the token will grow when market demand increases. Low supply and increasing demand are the key factors for token appreciation.
- We let our token holders help build the value of ARB by not releasing more tokens over time, increasing growth value for the entire Eco-system.
- ARB will never fork to create additional tokens in the future.

MISSION

Provide our investors with long term sustainable profits with our revolutionary Arbitrage trading platform. We will give our investors complete control and ultimate transparency with our decentralised platform by ensuring all transactions are documented on the Blockchain.

We aim to change the future of crypto investment platforms by replacing all short term Multi-Level Marketing / Ponzi schemes and provide investors with a safe, stable and transparent alternative.

Control Your Own **Money**
Make Your Own **Profits**
Be Your Own **Boss**

VISION

"We combine a small amount of circulating tokens with a formidable marketing team backed by innovative products based on software. I feel great knowing our team offers plans that help the overall potential for all of ARBITRAGING's investors."

David, CEO of ARBITRAGING

ROADMAP

Q4 2017
ICO Launch

Q2 2018
- Decentralised exchange
- Arbitrage platform launch
- Launch member access to aBOT and mBOT

Q4 2018
Marketing expansion to promote ARBITRAGING

Q1 2018
Started worldwide marketing campaign;
vBot released – see all profit opportunities on dashboard

Q3 2018
Hardware wallets compatibility (Trezor, Ledger Nano, etc.)

Q1 2019
Future roadmap to be released

ARBITRAGING
THE ARBITRAGE PROFESSIONALS

ARBITRAGING ECOSYSTEM

4 MAJOR PRODUCTS TO BOOST ARBITRAGING

A WALLET TO KEEP YOUR MONEY IN A SAFE PLACE

Offline wallet available on your web browser, Android and iOS devices

A DECENTRALIZED DASHBOARD TO INVEST ARB

Use your ARB to earn profits daily

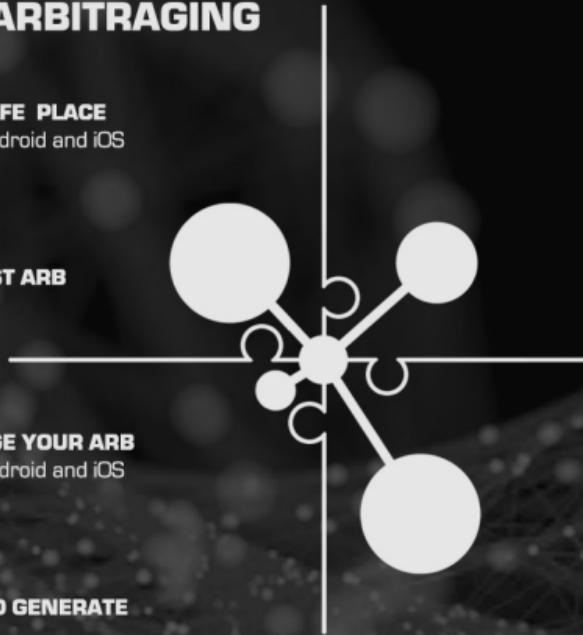

A DECENTRALIZED EXCHANGE TO MANAGE YOUR ARB

Offline wallet available on your web browser, Android and iOS devices

A CUSTOM ARBITRAGE BOT SOFTWARE TO GENERATE SUSTAINABLE DAILY PROFITS

We have customised our software to work on more Blockchain pairs and we will continue to add pairs in the future. We feel that our bespoke software will be one of the best arbitrage systems in the world.

ARBITRAGING

THE ARBITRAGE PROFESSIONALS

ARB VALUE OBJECTIVES

OUR PLAN FOR THE NEXT 12 MONTHS

IMMEDIATE GOAL

Promote our ERC20 token and negotiate with major exchanges to get listed on trusted platforms.

Q2 2018 : Token value \$50

We expect to be trading on at least 4 major exchange partnerships with high demand to pass the cap of \$50 per token in the first 4 months. Also our Wallet & decentralised exchange will be fully functioning.

Q3 2018 : \$100

Arbitrage system running at full capacity with many additions.

Q4 2018 : \$200

With our low total token supply combined with our BOT software producing sustainable long term profits, future demand for ARB will push the token value over \$200 by end of 2018.

THE ARBITRAGE PROFESSIONALS

ARBITRAGE vBOT, aBOT & mBOT

TOKEN HOLDERS GET FREE ACCESS TO USE aBOT & mBOT

vBOT

vBOT is the Visual BOT which will work to constantly find you profitable Arbitrage trades 24 hours a day. vBOT will identify which coins can be bought and sold in different exchanges around the world. You can follow vBOT's instructions and start generating Arbitrage profits today!

aBOT

You can invest your ARB tokens in to aBOT - Auto BOT via our decentralised platform exclusively from the ARB dashboard. This aBOT will automatically find and trade Arbitrage opportunities where you can make a profit instantly. You will receive your profits daily directly to your external wallet. There is NO LOCK IN PERIOD so you are free to stop using the aBOT whenever you decide. You will only be paid a profit from the revenue generated by the aBOT, this makes ARB a long term sustainable project profit producing platform.

mBOT

We are also introducing our custom mBOT - Manual BOT which will allow ARB token holders the ability to perform free Arbitrage trades and keep all profits produced. Token holders will have free access to mBOT to start generating profits. With mBOT you will have a dashboard where you can view live arbitrage opportunities and then set your triggers to perform trades inside the guidelines, giving you complete control over the software. To use mBOT you will turn ARB into available fiat then perform arbitrage trades. You could then withdraw your capital and profits in the form of ARB. This product will drive the value of ARB for the future. Estimated launch of member used mBOT is Q2 2018.

ARBITRAGING
THE ARBITRAGE PROFESSIONALS

ARBITRAGING IS REVOLUTINISING CRYPTO INVESTMENT PLATFORMS

SUMMARY

TOKEN VALUE GROWTH

With only a small number of tokens (10 million) being released, the ARB token value will grow with future market demand.

COMPLETE CONTROL

A Fully Decentralised Platform – you never deposit on the ARB platform so you have full control. There are NO 30, 60, 90 day Investment Lock In Periods - so you can withdraw your funds whenever you decide.

COMPLETE TRANSPARENCY

All BOT activity is visible on the Blockchain – you see exactly which exchanges your investment is going to and which exchanges your investment is coming from. A summary of all the trades will also be provided so you can see exactly where your profits are generated.

STABLE LONG TERM PROFITS

Your daily profit comes from the profits made by our BOT software – NOT from new investor funds like a Ponzi scheme, so ARB will be a sustainable platform. Use the auto or manual BOT to make long term profits using Arbitrage. You will NEVER make a loss as aBOT will only buy a coin/token if it can sell it for a profit in another exchange.
